ABOUT ME

Technology has always been a significant part of my life, igniting my curiosity and driving my passion for innovation. From a young age, I found myself immersed in the world of computers, eagerly exploring different Linux distributions and relishing the challenge of troubleshooting and repairing. With a keen eye for detail and a holistic perspective, I approach problems with creativity and perseverance, always striving to find elegant solutions. Beyond technology, I possess a vivid imagination and a knack for problem-solving, traits that have served me well in both personal and professional endeavors. I thrive in dynamic environments where I can apply my diverse skill set to tackle new challenges and contribute meaningfully to innovative projects.

EDUCATION

Kocaeli University

Geological Engineering
2011-2013

Istanbul University

Business Administration
2012-2013

FORMER CAREER

Career Transition

2022 - 2023

My transition from Starbucks to the software industry reflects my lifelong passion for technology. From repairing computers to exploring various technologies, I've always been fascinated by the inner workings of technology. Detail-oriented yet able to see the big picture, I possess a natural curiosity and a knack for problem-solving. These traits, coupled with my experience as a power user, have prepared me to excel in the dynamic world of software development.

Shift Supervisor

Starbucks Coffee Company   2020 - 2022

Transitioning into the role of Shift Manager, I embraced the opportunity to lead a team, ensuring smooth operations and fostering a positive work environment. By overseeing shifts, managing inventory, and providing guidance to fellow employees, I strengthened my organizational and leadership abilities while maintaining Starbucks' high standards of quality and service.

Barista

Starbucks Coffee Company   2017 - 2020

As a barista at Starbucks, I cultivated my passion for delivering exceptional customer service while crafting high-quality beverages. Through engaging with diverse clientele and honing my multitasking skills in a fast-paced environment, I developed a keen eye for detail and an ability to thrive under pressure.

WORK EXPERIENCE

🏵 Front-End Developer Intern

BilgeAdam Akademi   6/2023 - 12/2023

- Completed a 6-month intensive program focused on Front-End Web Development.
- Developed over 100 projects using HTML, CSS, JavaScript, and React.
- Tested, debugged, and deployed code across various teams.
- Received mentorship from senior developers and implemented feedback.
- Optimized HTML code for SEO and Accessibility standards.
- Contributed to maintaining development standards within a small team.
- Engaged in Agile practices with weekly stand-up meetings.

PROJECTS

🏵 My Portfolio Site

www.oguzcantoptas.com

- Creating a Portfolio Website with Next.js:
  - Developing a fast and interactive portfolio website using Next.js.
  - Utilizing Next.js features such as page routing, dynamic routing, and data fetching.
- Authentication Integration with Auth0:
  - Integrating authentication using Auth0's package for Next.js.
  - Managing user signup, login, and logout processes.
- Styling with Tailwind CSS:
  - Creating styles for the website using Tailwind CSS.
  - Building a consistent and rapid style using pre-built components and utility classes.
- Database Integration with Vercel Postgres:
  - Integrating a PostgreSQL database with Vercel for data storage and retrieval.
  - Managing database queries and interactions within the Next.js application.
- TypeScript Integration:
  - Incorporating TypeScript into the project for static typing and enhanced developer experience.
  - Ensuring type safety and improved code maintainability.
- UI Components with Headless UI:
  - Using Headless UI to create accessible and customizable UI components.
  - Enhancing user experience and interface consistency with Headless UI components.
- Redux Toolkit Integration:
  - Integrating Redux Toolkit for state management in the project.
  - Managing global application state and complex data flows efficiently.

🏵 weatherSimplified

https://ogiboy.github.io/weatherSimplified/

- HTML and CSS:
  - Creating a clean and organized design structure using semantic HTML.
  - Utilizing custom CSS for personalized styling.
- JavaScript Functionality:
  - Dynamically updating content by fetching weather data from the OpenWeatherMap API using the Fetch API.
  - Processing user input for location and retrieving weather information accordingly.
  - Converting Unix timestamps into readable date and time formats.
- API Integration:
  - Integrating weather data from the OpenWeatherMap API.
  - Converting location names to latitude and longitude coordinates using the Geocoding API.
- Accessibility and User Experience:
  - Implementing accessible markup and ARIA attributes for screen reader compatibility.
  - Utilizing localStorage to store and display search history for improved user experience.
